Program Overview:

This SAFe® Agilist certification training course teaches you the lean-agile principles and practices of SAFe. This SAFe, or Scaled Agile Framework certification, is a two-day course that helps you understand the lean-agile mindset, execute with agile release trains (ART), build an agile portfolio, and lead lean-agile transformation in an organization.

Program Features:

- > Two-day classroom training
- > SAFe Agilist exam fee included
- > Delivered by SPC
- > One-year certified membership as a SAFe Agilist

Delivery Mode:

Classroom training

Prerequisites:

While there are no prerequisites for taking this course, it's recommended that you have at least five years of experience in software development, testing, business analysis, or project management. It is also additionally recommended that anyone taking this course has a basic understanding of agile scrum.

Target Audience:

- > Executives and leaders, managers, directors, CIOs, and VPs
- > Development, QA, and infrastructure managers
- > Program and project managers
- > Product and product line managers
- > Portfolio managers, PMO, and process leads
- > Enterprise, system and solution architects

Key Learning Outcomes:

At the end of Simplilearn's training, you will:

- > Understand and learn about the SAFe Application
- > Execute agile release trains
- > Coordinate value streams
- > Manage lean-agile portfolios
- > Configure the framework
- > Unlock intrinsic motivation
- > Support lean-agile

Certification Alignment:

Our SAFe Agilist Certification course is aligned with the [Scaled Agile Framework](#)[®] and we are the training provider for this course

Certification Details and Criteria-

Certified SAFe Agilist is a prized certification offered by Scaled Agile. A certified SAFe Agilist can apply SAFe to scale agile development in an enterprise organization and apply agile principles. Scaled Agile Framework (SAFe) certified professionals are recognized globally for their ability to support the successful transformation of organizations into a lean-agile enterprise.

Benefits of the SAFe Agilist certification include -

- > Learn to apply lean, agile, and product development flow principles to improve productivity, employee satisfaction, time-to-market, and quality
- > Understand the interaction between agile teams, agile programs, and agile portfolio management
- > Become a guide in leading the success, adoption, and constant developments of SAFe in an enterprise

The Certification Process-

The steps for becoming a SAFe certified professional are:

- › Step One: Attend the leading SAFe course.
- › Step Two: Pass the SAFe Agilist online test conducted by Scaled Agile; a candidate must correctly answer at least 34 out of the 45 questions, which translates to at least a 75% passing score
- › Step Three: Submit a license agreement to the Scrum Alliance for acceptance
- › Step Four: Complete a member profile

The Certification Process-

- › Step Four: Complete a member profile
